Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's response filed on 03/26/2007 has been fully considered. Claim 1 is amended, claims 2, 8 and 9 are canceled, and claims 1, 3-7 and 10-20 are pending.
(NOTE: Claims 13-20 are withdrawn from consideration as non-elected invention).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1, 3-7 and 10-12 are rejected under 35 U.S.C. 102(a) as being anticipated by Nishizawa et al. (US 6,551,671 B1).
4. Nishizawa discloses an in-mold label comprising a base layer and a printed mater provided on the base layer, wherein the base layer comprises a core layer, a surface or front layer on the printing side of the base layer, and a back layer on the side opposite the surface layer (Fig. 2). The core layer is equivalent to the claimed substrate. Even though the surface layer is part of the base layer, it is a layer between the core layer and the printed mater, thus it is equivalent to the claimed first down coat layer. The base layer comprises a thermoplastic resin microporous film having a molecular weight of 10,000 to 500,000 (col. 3, line 6). The thermoplastic resin can be poly(ethylene terephthalate) (col. 2, line 63).

Response to Arguments

5. Applicant's argument is based on that the core layer is not equivalent to the claimed substrate. This argument is not persuasive because the core layer of the prior art is a porous thermoplastic layer as recited in current claim 1, thus core layer is equivalent to the claimed substrate.
6. Applicant further argued that the resin composition to form the surface layer is not equivalent to the composition to make the claimed first down coat. This argument is not persuasive because the film-forming resin used as the material to form the base layer of the prior art is not limited to polyethylene, the resin can also be polyethylene terephthalate (col. 2, line 63), which is equivalent to the claimed polyester film forming resin.
7. For the above reasons claims 1, 3-7 and 10-12 stand rejected.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
9. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1774

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
